## Working Title

Project DFX

## Elevator Pitch

I'm developing a turn-based RPG game set in a variety of locations from the real world as well as fictional locations. The gameplay is heavily inspired by the games "Honkai Star Rail" & "Tekken". This game represents turn-based meets fighting games.

## Concept

### Overview

- **Genre:** Single-Player Turn-based RPG / Fighting
- **Target audience:**
  - **Age:** 13+
  - **Gender:** Male / Female
- **Monetization:** Free

- **Platforms & system requirements:**
  - Windows OS

## Theme and Setting

Project DFX is a turn-based game imbued with fighting game mechanics. The player chooses their character from the game's pool to take on enemies of different difficulties. Each character have unique skills, and so does the enemies! Each stage is set in a different environment, matching the enemy's concept.

# Game Setting

## Locations

### Training Room

#### General description

The training room is a basic empty room. It is a place for the players to test out the characters and their abilities against a stationary dummy bot.

#### Inspiration

#### Levels that use this area

- Practice Mode

### Shibuya Crossing (Night)

#### General description

Shibuya is a major commercial and finance center located in Tokyo, Japan. It is a lively and busy area, famous for its nightlife and its youth culture. However, the arrival of an enemy renders the area empty. The player must defeat the enemy to bring back the nightlife back to its normal state.

Lore: [Naoi Miya](#) reaches the crossing upon sensing a curse nearby, the [Finger Bearer](#) that is causing a disturbance in the area.

## Inspiration

## Levels that use this area

- [Level 1: Easy](#)

## Dimension Crack

### General description

This area is a void-like place which houses the enemy that caused a crack in the dimension, causing an instability in the multiverse.

Lore: [Silver Dez](#) enters the dimension crack through a portal to defeat the [Void Shadow](#), and stabilize the multiverse.

## Inspiration

## Levels that use this area

- Level 2: Medium

## Demon Tower

### General description

A fiery, hell-like tower. There are multiple floors with different enemies in each of them. However, the top of the tower is where the strongest enemy, the final boss resides. Beat this enemy and gain the title of the strongest 'player'.

Lore: [Kang Ah Yeon](#), the light monarch, reaches the top of the tower, prepared to fight the [Frost Monarch](#) and beat the final stage of the 'game'.

## Gameplay & Mechanics

### Gameplay

#### Game Progression

The game offers 3 levels of difficulty as well as 3 unique playable characters that the player will be using in the battles. The player can choose any character for any stages, as well as choose any stages without having to complete other stages prior.

(\*Image above is a concept of the game interface\*)

#### Objectives

Master the combat system of the game, as well as the unique abilities of each characters. Work your way up from the easiest difficulty, or challenge yourself by diving into the hardest difficulty.

### Mechanics

## Actions

### Combat

#### Abilities

Each character has a set of offensive abilities and a defensive ability. Triggering these abilities are done by performing a specific sequence of inputs during your turn. Multiple abilities can be triggered during a turn. If a player succeeds to perform a defensive ability, any incoming attacks during the opponent's turn is blocked and will not deal damage.

#### Turn-based

Your turn consists of a window of time in which you can perform a sequence of inputs to trigger abilities. Once this window expires, any correct sequence that are recognized, its corresponding ability will be put on action. The turn then goes to the enemy, and this process is repeated until either the player or the enemy's HP drops to zero.

## Cheats & Easter Eggs

### Guide Book

Access the guide book in order to view the sequence of inputs required to perform the abilities of each character.

This can be accessed in the main menu as well as during the game when it is paused.

# Levels

## Practice Mode

### Synopsis

Try out characters and practice their abilities in this mode where the opponent is stationary (does not perform any actions) and has unlimited health, which allows the player to practice for as long as they want.

### Objectives

- Get familiar & hone your skills with the ability input system
- Test out the characters' abilities and try out different combinations

### Location

Training Room

## Level 1: Easy

### Synopsis

The player will have plenty of time (5 seconds) to perform abilities. The opposing AI for this level will not be able to perform defensive abilities. They also have a higher chance to not perform any offensive abilities.

### Objectives

- Defeat the curse that has appeared in the crossing to restore the area's normal state
- Get familiar with the turn-based system of the game

### Location

[Shibuya Crossing \(Night\)](#)

## Level 2: Medium

### Synopsis

The player has a reduced amount of time during their turn (3.5 seconds) to perform abilities. The opposing AI can now perform defensive abilities. They also have a higher rate of performing offensive abilities in comparison to [Level 1: Easy](#)

### Objectives

- Defeat the opponent to fix the crack in the dimension and stabilize the multiverse
- Improve on performing more abilities in quicker succession
- Get an experience on the defensive abilities of the opponent

### Location

[Dimension Crack](#)

## Level 3: Hard

### Synopsis

The player has 2 seconds during each turn to perform abilities. The opposing AI will always perform an offensive ability (Thus, it is recommended to always perform a defensive ability on the player's side). They can also perform defensive abilities better than the previous [Level 2: Medium](#)

### Objectives

- Defeat the final boss of the game to become the strongest player and the king of the tower
- Execute abilities in perfect manner
- Execute multiple abilities in a short succession
